

Young Duck Kim

Post-Doctoral Research Scientist,
 Department of Mechanical Engineering,
 Columbia University,
 New York, U. S. A
 Tel: +1-917-370-0613
 E-mail: yk2629@columbia.edu

Education	Ph. D. in Physics , Aug. 2012 Seoul National University , Department of Physics and Astronomy, Seoul, Republic of Korea <ul style="list-style-type: none"> • Advisor: Yun Daniel Park • Dissertation title: Nanoelectromechanical system for characterization of low dimensional materials
	B. S. in Physics , Feb. 2006 Yonsei University , Department of Physics, Seoul, Republic of Korea
Research Career	Post-Doctoral Research Scientist (Dec. 2013-) Department of Mechanical Engineering, Columbia University, New York, U.S.A <ul style="list-style-type: none"> • Advisor: James Hone • van der Waals heterostructure electrical transport and optoelectronics
	Post-Doctoral Research Associate (Sept. 2013- Nov. 2013) Division of Physical Metrology, Korea Research Institute of Standards and Science, Daejeon, Republic of Korea <ul style="list-style-type: none"> • Advisor: Jae-Hyuk Choi • SQUID-micro torsional resonator hybrid system
	Post-Doctoral Research Associate (Sept. 2012- Aug. 2013) BK 21 Frontier Physics Research Division, Department of Physics and Astronomy, Seoul National University, Seoul, Republic of Korea <ul style="list-style-type: none"> • Advisor: Yun Daniel Park • Optical, thermal, electrical and mechanical properties of suspended graphene and nanowire • Mesoscopic system with mechanical degree of freedom
	Special Adviser of Valuations of Patented Technologies (Feb. 2013- Feb. 2016) Korea Invention Promotion Association
	Research Assistant (Feb. 2011- Aug. 2013) Korea Research Institute of Standards and Science, Daejeon, Republic of Korea <ul style="list-style-type: none"> • Magnetic flux quantization in superconductor nano-ring • Aharonov-Bohm effect in novel metal nano-ring
	Head Manager of Cleanroom (Feb. 2009-Mar. 2010) Department of Physics and Astronomy, Seoul National University, Seoul, Republic of Korea
	Teaching and Research Assistant (Mar. 2006-Feb. 2009) Department of Physics and Astronomy, Seoul National University, Seoul, Republic of Korea
Research Interest	van der Waals materials (Graphene, MoS₂, WSe₂, CNT, Nanowire) <ul style="list-style-type: none"> -Quantum transport in van der Waals heterostructure -van der Waals heterostructure based optoelectronics -2D material based flexible and transparent optoelectronics for display module -Ultrafast light emitter and photodetector for on-chip optical interconnects

Nanoelectromechanical System (NEMS) in the quantum regime

- Ultra high frequency and high Q-factor nanomechanical resonators
- Low dimensional material nanoelectromechanical systems
- Opto-electro-mechanical systems
- On-chip mechanical motion detection systems

Mesoscopic system with mechanical degree of freedom

- Aharonov-Bohm effect in novel metal nano-rings with mechanical degree of freedom
- Magnetic flux quantization and persistent current in superconductor/normal-metal rings
- Quantum momentum squeezing effects in nanomechanical systems
- Graphene and 2D superconductor Josephson junctions

Area of Specialization**1. Nanofabrication of low dimensional material**

- Sub 20nm **e-beam lithography** patterning using Tescan VEGA TS 5130MM and Nano Patterning Generate System (NPGS)
- Sub 50nm **align** and transfer with **graphene, carbon nanotube and nanowires**
- Sub micron **photo lithography** patterning using Karl Suss MJB3
- Dry etching using home built **Reactive Ion Etching (RIE)**–O₂, Ar, CF₄, SF₆
- Sub 50nm ion milling and Pt deposition **using Dual beam FIB** (FEI 3D Quanta)
- Metallization **using e-gun evaporator, thermal evaporator and sputter system**
- Suspended low dimensional materials (graphene, carbon nanotube and nanowire) structures** using wet/dry etching and transfer method

2. Ultrafast opto-electrical characterization of low dimensional materials

- Photo/thermoelectric transport of low dimensional materials
- Blackbody radiation spectrum measurement
- Micro Raman-PL spectroscopy of graphene and nanowire
- Photonic crystal and plasmonic structure
- Ultrafast on-chip optical communications

3. Ultra small mechanical motion detection

- Sub-picometer displacement detection technique using **optical interferometer and magnetomotvie techniques**
- Developing of **mesoscopic system** for angular displacement detection
- Anelastic effect measurement by dynamic long loading cycle technique
- Quasi-flexure measurement for investigation mechanical properties of low dimensional material using AFM

4. Low temperature and high magnetic field measurement

- Quantum transport of low dimensional material at low temperature (300 mK)
- High magnetic field transport of low dimensional material (32 and 45 Tesla – National High Magnetic Field Laboratory in U.S.A)

Scholarship & Award**Guinness World Records – Thinnest Light Source (2016)**

“The thinnest light source is 0.335 nm thick”

Graduation with honors and The Graduate Student Research Award (2012)

Department of Physics and Astronomy, Seoul National University, 29 August, 2012

Best Presentation Award (2011)

The Korean Physical Society Fall Meeting, Busan, Republic of Korea, 19-21 October, 2011

4th BK 21 Young Physicists Poster Award (2011)

Pohang University of Science and Technology, Pohang, Republic of Korea, 20-21 January, 2011

Presentation Award (2010)

Seoul National University BK Workshop, Seoul, Republic of Korea, 23 December, 2010

Best Presentation Award (2010)

The Korean Physical Society Fall Meeting, Pyeongchang, Republic of Korea, 20-22 October, 2010

Best Poster Award (2010)

The Korean Physical Society Fall Meeting, Pyeongchang, Republic of Korea, 20-22 October, 2010

BK 21 excellent TA Award (2010)

Department of Physics and Astronomy, Seoul National University, Seoul, Republic of Korea, 2010

2nd BK 21 Young Physicists Award (2009)

Korea Advanced Institute of Science and Technology, Daejeon, Republic of Korea, 17-18 January, 2009

BK 21 Fellowship (2008)

Department of Physics and Astronomy, Seoul National University, Seoul, Republic of Korea, 2008

Best Poster Award (2008)

The Korean Physical Society Fall Meeting, Gwangju, Republic of Korea, 23-24 October, 2008

Seoul Science Fellowship (2008)

Department of Physics and Astronomy, Seoul National University, Seoul, Republic of Korea, 2008

International Conference Presentation

1. “*Bright Visible Light Emission from Graphene*”
International Winterschool on Electronic Properties of Novel Materials 2016, Kirchberg, Tirol, Austria, 13-20 February, 2016. (Invited)
2. “*h-BN Encapsulated MoS₂ for Intrinsic Transport*”,
Material Research Society 2014 Fall Meeting, Boston, Massachusetts, USA, 1-5 December, 2014.
3. “*van der Waals Heterostructure for Approaching Intrinsic Transport*”,
The 2014 X-ray Scattering Principal Investigators’ Meeting, Gaithersburg, Maryland, USA, 4-6 November, 2014.

4. "Focused Laser Induced Spatially Controllable P-N Junctions in Graphene Field-Effect Transistor", **The American Physical Society 2013 March Meeting**, Baltimore, Maryland, USA, 18-22 March, 2013.
5. "Ultra small angular displacement measurement from superconductor/AB nano-ring coupled to a micro-torsional resonator", **Gordon Research Conference-Mechanical Systems in the Quantum Regime**, Hotel Galvez, Galveston, Texas, USA, 4-9 March, 2012.
6. "Mechanical and Optical Properties of Single CdS Nanowire of Nanomechanical Resonators", **Workshop on Nano-Opto-Electro-Mechanical Systems Approaching the Quantum Regime**, The Abdus Salam International Centre for Theoretical Physics, Miramare, Trieste, Italy, 6-10 September, 2010.
7. "Enhanced Stabilities in Resonant Response of Carbon Nanotube Network Reinforced Al Thin-Film Nanomechanical Resonators", **AVS 56th International Symposium & Exhibition**, San Jose, California, USA, 8-13 November, 2009.
8. "Suppression of Anelastic Effect in Micromechanical Resonators from suspended Al-CNT Nanolaminate Thin-Films", **AVS 55th International Symposium & Exhibition**, Boston, Massachusetts, USA, 19-24 October, 2008.
9. "Metal-carbon nanotube composite nanoelectromechanical torsional resonators", **The American Physical Society 2007 March Meeting**, Denver, Colorado, USA, 5-9 March, 2007.

Domestic Conference Presentation

1. "Focused-Laser-Enabled P-N Junctions in Graphene Field-Effect Transistors", **The Korean Physical Society 2013 Spring Meeting**, Daejon Rep. Korea, 24-26 April, 2013.
2. "Local Laser Heating to Graphene Nanomechanical Resonator for probing Negative Thermal Expansion of Graphene", **The Korean Physical Society 2011 Fall Meeting**, Busan, Rep. Korea, 19-21 October, 2011.
3. "Nanomechanical System for Accurate Characterization of Low Dimensional Material", **4th BK21 Young Physicists Workshop**, Pohang, Rep. Korea, 20-21 January, 2011.
4. "Nanomechanical System for Characterization of Low Dimensional Material", **Seoul National University BK21 Workshop**, Seoul, Rep. Korea, 23 December, 2010.
5. "High Frequency CdS Nanowire Opto-Mechanical Resonators", **The Korean Physical Society 2010 Fall Meeting**, Pyeongchang, Rep. Korea, 20-22 October, 2010.
6. "Characterization of Anelastic effects in Metallic and Metallic-CNT Micromechanical Resonators", **The Korean Physical Society 2009 Fall Meeting**, Changwon, Rep. Korea, 21-23 October, 2009.
7. "Suppression of Anelastic Effect in Micromechanical Resonators from suspended Al-CNT Nanolaminate Thin-Films", **2nd BK21 Young Physicists Workshop**, Daejeon, Rep. Korea, 17-18 January, 2009.
8. "Enhanced Elastic Modulus and Thermo Mechanical Behavior of Micromechanical Resonators from Metal-carbon Nanotube Nanolaminates", **The Korean Physical Society 2008 Fall Meeting**, Gwangju, Rep. Korea, 23-24 October, 2008.
9. "Control of Nonlinear Effect in Carbon Nanotube Network Encapsulated in a Metallic Nanoelectromechanical system (NEMS) Resonator", **The Korean Physical Society 2007 Fall Meeting**, Jeju, Rep. Korea, 18-19 October, 2007.

10. “*Nanoelectromechanical systems (NEMS) torsional resonators of carbon nanotube network and metal-carbon nanotube composites*”, **The Korean Physical Society 2007 Spring Meeting**, Pyeongchang, Rep. Korea, 19-20 April, 2007.

Patents

1. *An integrated direct-band semiconductor nanowire on mechanical structures to facilitate measurement of structures displacement*”, **Republic of Korea**, 10-1223233 (2013).
2. *Graphene device and manufacturing method of thereof*”, **Republic of Korea**, 10-2013-0020594 (2013).
3. *Bright visible light emission from electrically biased graphene*”, **U.S.A.**, Patent pending (2016).
4. *Interlayer-mediated control of crack propagation*”, **U.S.A.**, Patent pending (2016).
